from driving schools, safety advocates, and test takers highlighted ambiguities—particularly around lane changes, parallel parking, and traffic—signal compliance. In response, the DMV convened a working group that benchmarked New York’s criteria against neighboring states and federal safety guidelines. The resulting score sheet introduces discrete categories, each assigned a. Category granularity. The previous sheet grouped “control” maneuvers into a single line item worth 15 points. The new version separates steering control, speed management, and observation into three distinct sections, each worth up to 5 points. Pass/fail cutoff. Instead of a binary “pass” determination once the examiner noted a critical error, the updated sheet requires a minimum of 75 out of 100 points, with no single category dropping below 12 points. This mirrors the scoring models used in Maryland and Virginia, where a balanced performance across all skills is mandatory. Immediate feedback. Examiners now record the exact point loss for each error, allowing candidates to receive a printed breakdown immediately after the test. This contrasts with the older system, which often left drivers uncertain about the specific reasons for failure.
