replaces or supplements other local revenue streams, ensuring that the city can maintain infrastructure without raising property taxes dramatically. For taxpayers, the key point is that the municipal tax is mandatory and calculated separately from the state's progressive tax schedule. Resident rate: a higher percentage applied to all earned income of people who list Kettering as their primary residence. Non-resident rate: a lower percentage charged to individuals who work in Kettering but live elsewhere. Both rates are flat—not progressive—so the same percentage applies regardless of income level. This simplicity means that the tax impact scales directly with earnings, making it easier to forecast. Although the city's tax is flat, the term "brackets" often appears in payroll software because the rate is applied after the state's progressive brackets are calculated. For example, a resident earning \$50,000 annually will see the municipal tax deducted after Ohio's state brackets are applied, effectively reducing the net amount that reaches the employee. Non-residents with the same salary experience a smaller municipal deduction, leaving more take-home pay.
